**Name:** Dhiraj Birajdar
**Batch:** 1154
**Homework:** Read data from one file and write in another file

**Assignment description:**

```java
package filehandling;
import java.io.*;

public class CopyFileData {
    public static void main(String[] args) throws IOException{

                // ------------try with resources------------
        System.out.println("try with resources: ");
        try (BufferedReader br = new BufferedReader(new
FileReader("files/java1.txt"));
                BufferedWriter bw = new BufferedWriter(new
FileWriter("files/java2.txt"))){
            for(String l;(l = br.readLine()) != null;bw.write(l+"\n"));

            System.out.println("File Data copy operation complete.");
        }catch(Exception e){
            System.out.println("File Data copy Operation cannot be
performed : >"+e);
        }

        // ------------try with finally------------
        BufferedReader brc = null;
        BufferedWriter bwc = null;
        String s;
        System.out.println("\ntry with finally: ");
        try {
            brc = new BufferedReader(new
FileReader("files/java1.txt"));
```

```java
            bwc = new BufferedWriter(new
FileWriter("files/java3.txt"));
            while((s = brc.readLine()) != null)
                bwc.write(s+"\n");
            System.out.println("File Data copy operation complete.");
        }catch(Exception e){
            System.out.println("File Data copy Operation cannot be
performed : >"+e);
        }finally {
            brc.close();
            bwc.close();
        }
    }
}
```
